

HOW TO BUY OUR PRESALE

Step 1.

Step 1: Install a suitable crypto wallet.

The first step is to ensure that you have access to a suitable wallet that can connect to the Presale site (PinkSale).

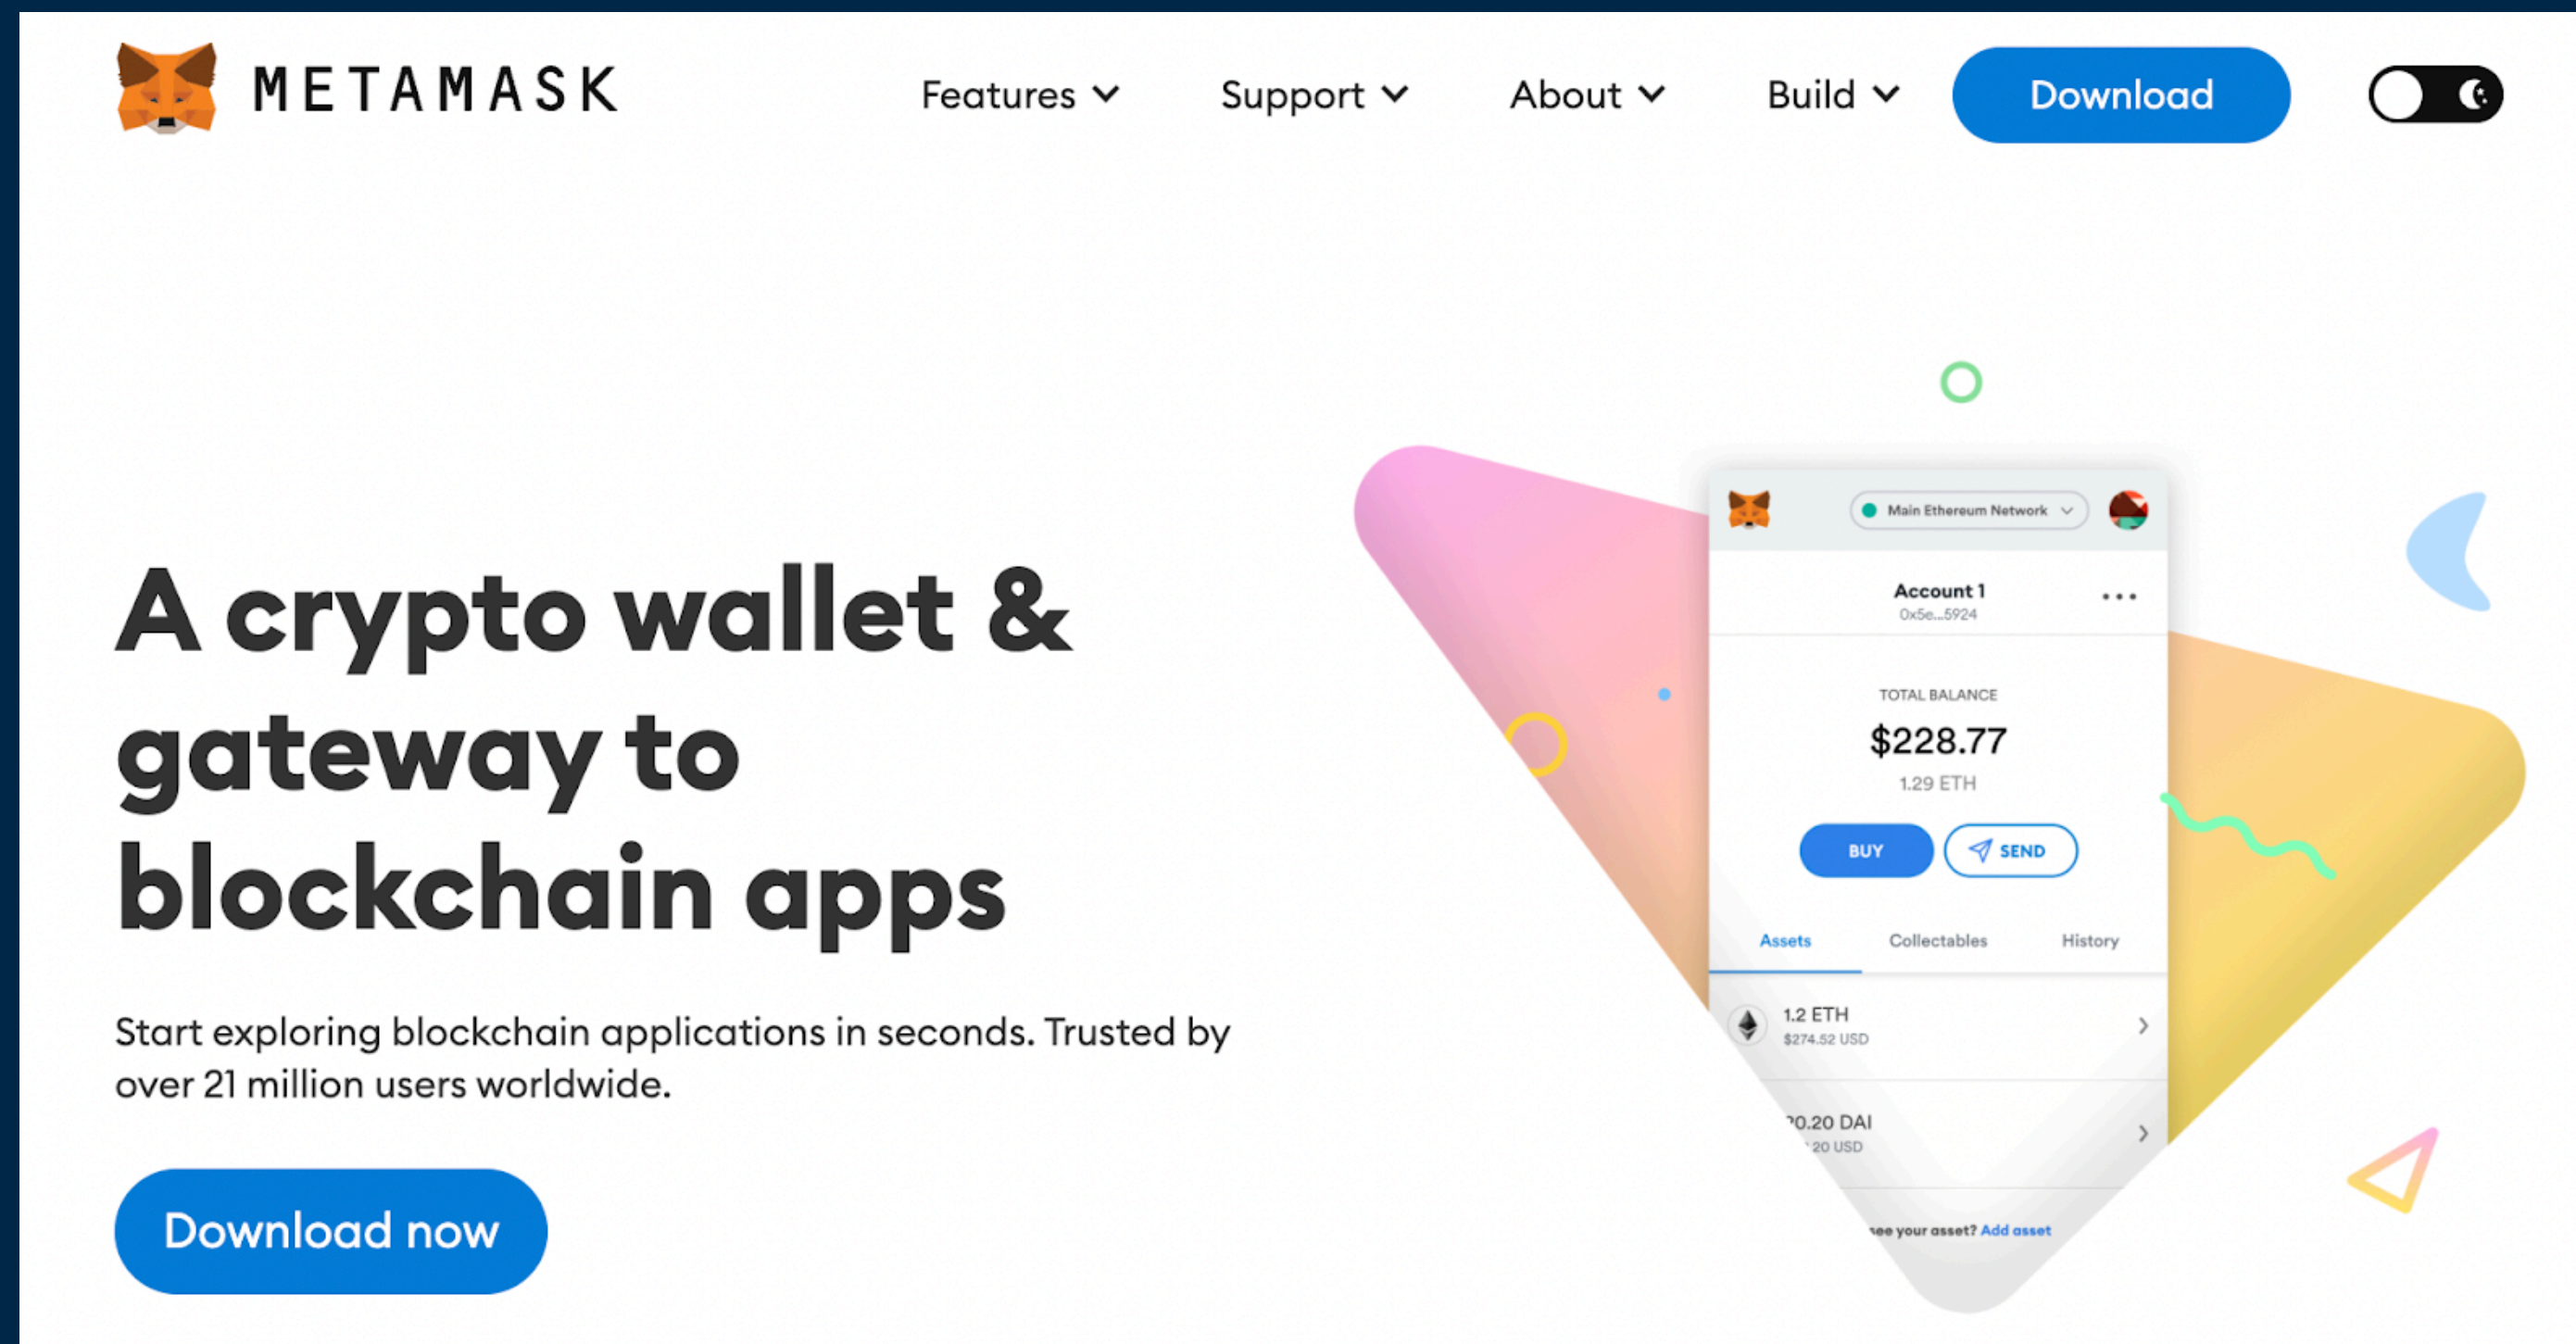

The two dominant players in this space are MetaMask and Trust Wallet.

MetaMask is a good option because it has both a mobile app and a Google Chrome extension that make it easy to use.

In this guide we will take you through how to make a purchase on a presale launch using the MetaMask browser extension.

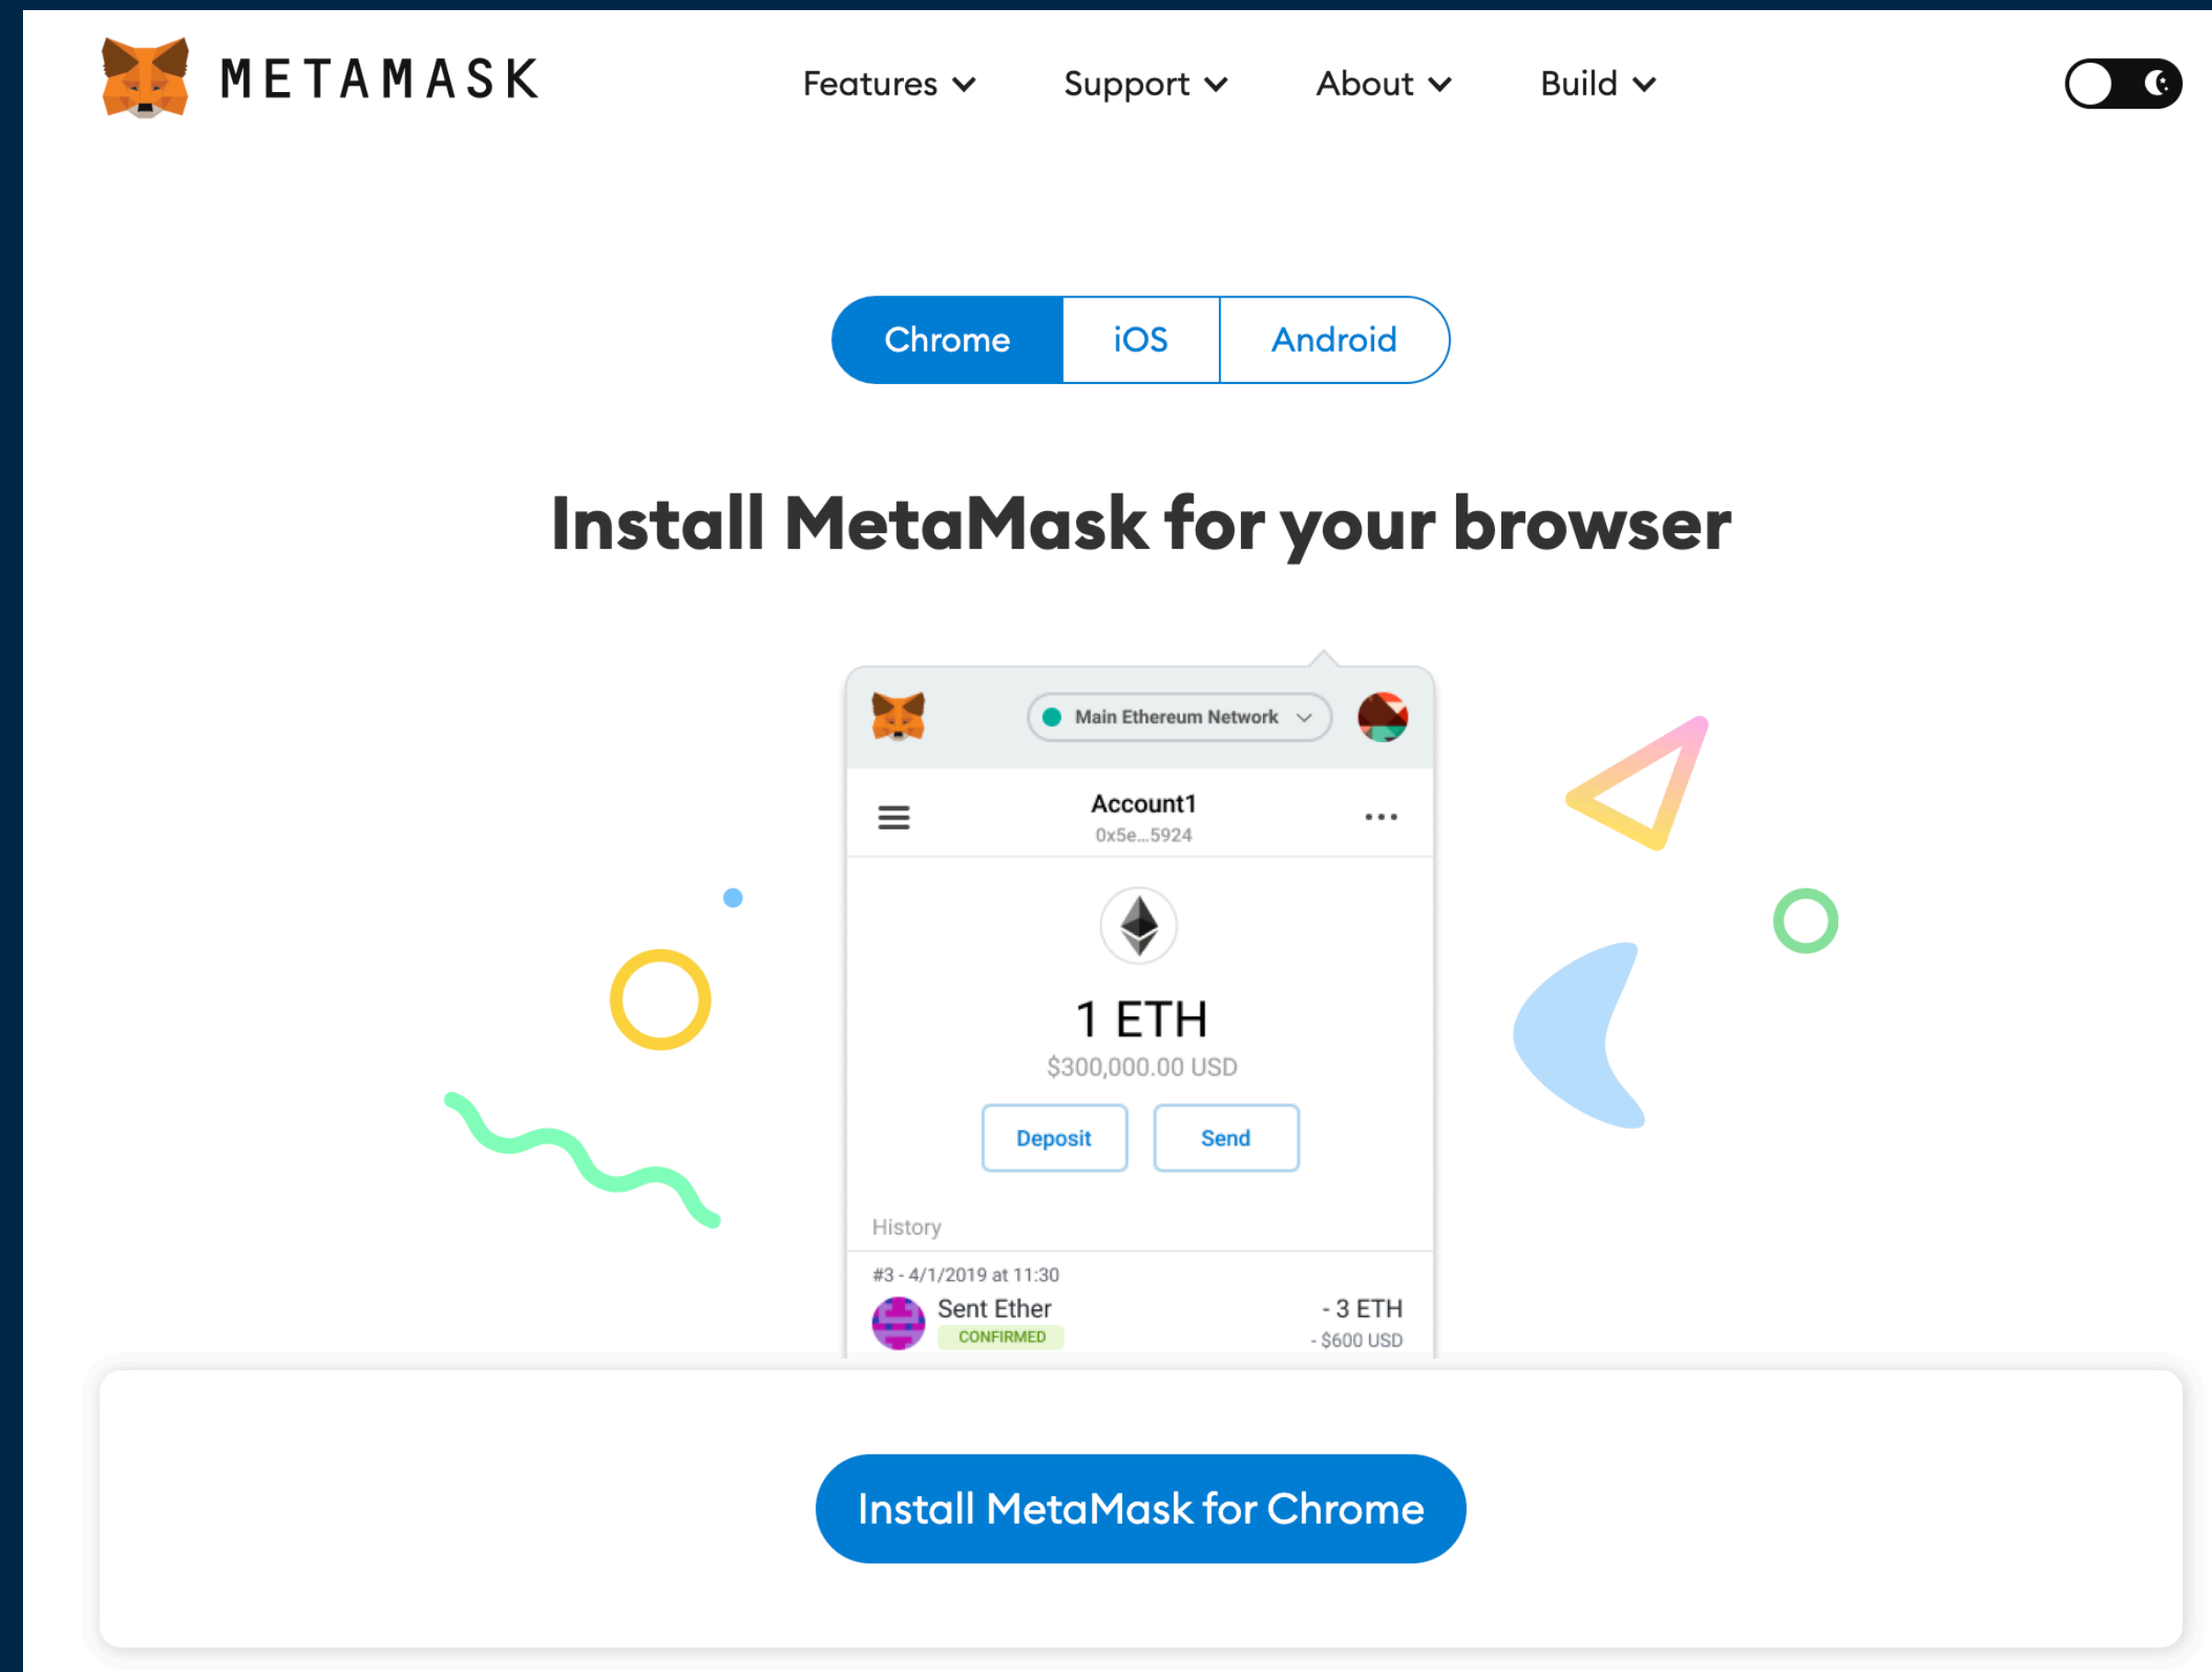

Step 1.1

Visit the official MetaMask website and click on the ‘Download now’ button.

Step 1.2

Click on the 'Install MetaMask for Chrome' button.

Note: MetaMask also comes as a browser extension for Firefox, Brave, and Edge.

Step 2.

Step 2: Account setup.

Once installed, click 'Get Started' and follow the prompts. You will need to create a strong password and write down your 12-word backup phrase.

The latter is required in the event you forget your password or lose the device that the wallet is installed on. Never share this phrase with anyone, as they will be able to access your MetaMask wallet remotely.

Step 3.

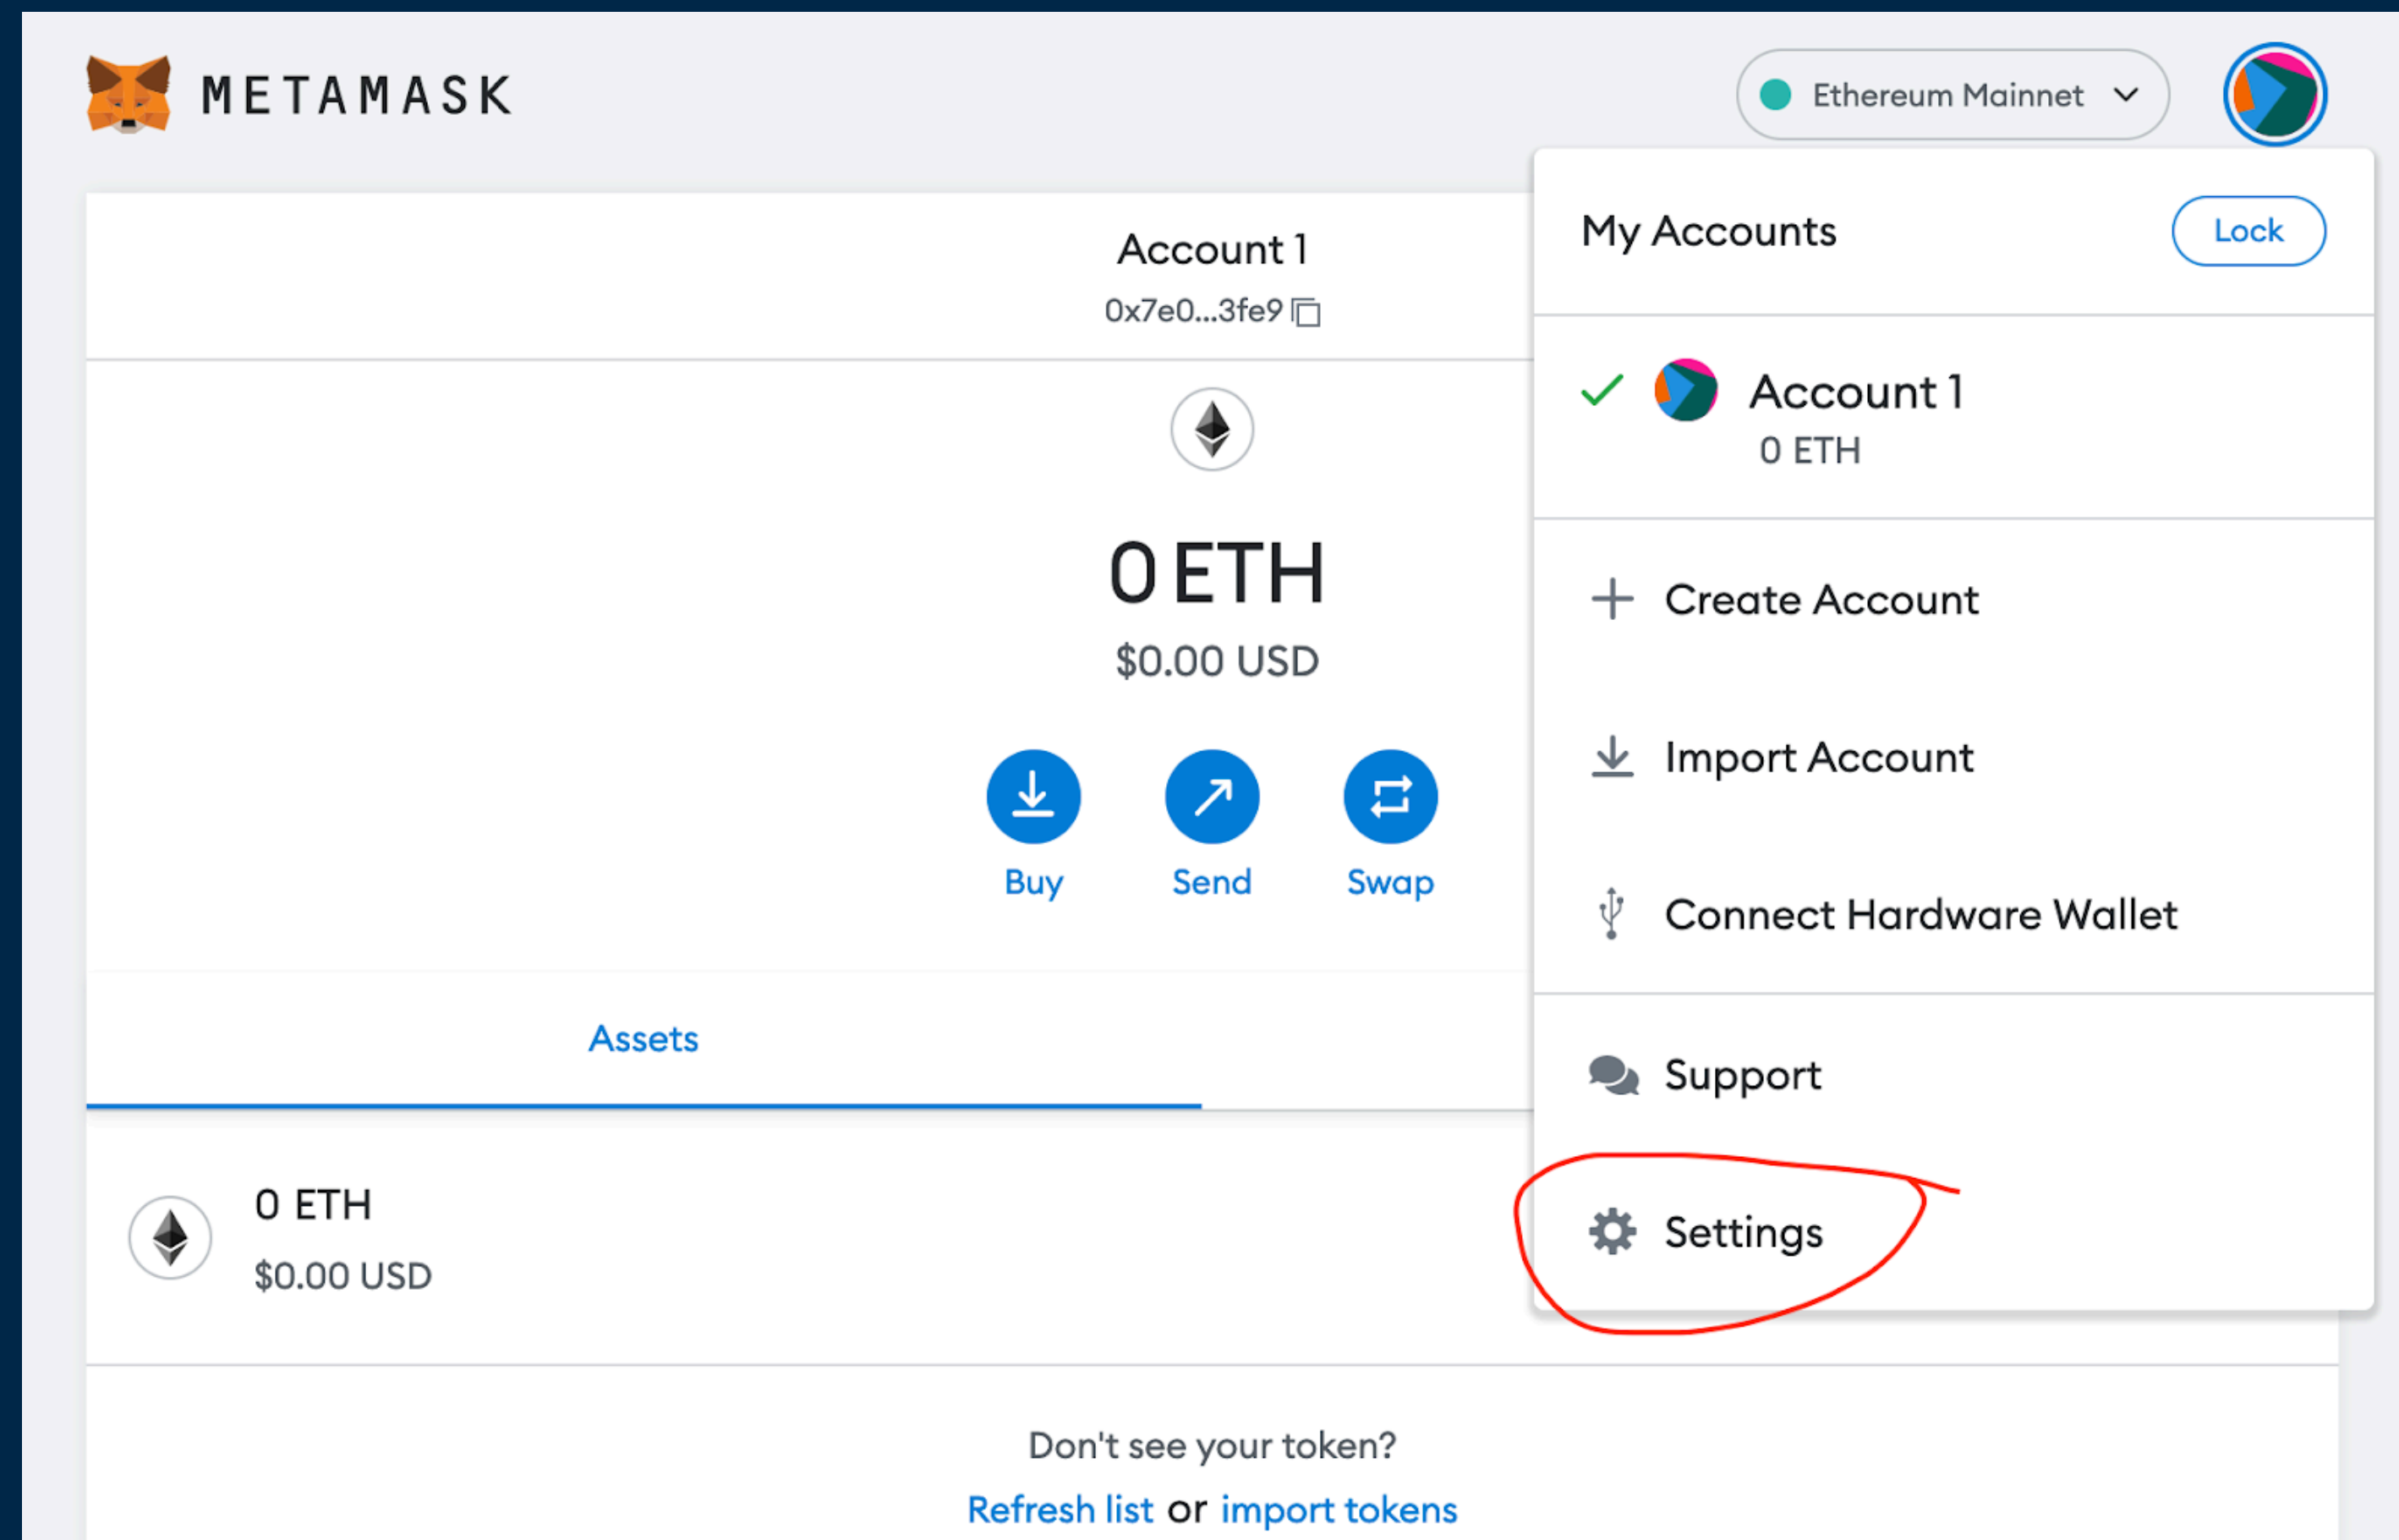

Step 3: Setup your wallet.

Configure your wallet to work with the Binance Smart Chain

Step 3.1

To configure your wallet click on settings under the 'My Accounts' tab.

Step 3.2

Click on 'Networks' and then 'Add a network'

The screenshot shows the 'Settings' interface with a sidebar on the left and a main content area. The sidebar contains the following items: General, Advanced, Contacts, Security & Privacy, Alerts, **Networks** (circled in red), Experimental, and About. The main content area is titled 'Settings' and has a search bar. Below the search bar, the 'Networks' section is active. It features a search bar for previously added networks and a list of networks. The 'Ethereum Mainnet' is listed with a green checkmark and a lock icon. Below it, under 'Test networks', are Ropsten Test Network, Rinkeby Test Network, Goerli Test Network, Kovan Test Network, and Localhost 8545. To the right of the network list, there is a form to add a new network. The 'Add a network' button is circled in red. The form fields are: Network Name (Ethereum Mainnet), New RPC URL (https://mainnet.infura.io/v3/), Chain ID (1), Currency Symbol (ETH), and Block Explorer URL (Optional).

Block Explorer URL (Optional)

Step 3.3

Copy and paste the following data into the relevant field:

- Network Name: Smart Chain
- New RPC URL: <https://bsc-dataseed.binance.org/>
- Chain ID: 56
- Symbol: BNB
- Block Explorer URL: <https://bscscan.com>

Confirm by clicking on the ‘Save’ button.

Now, at the top of your MetaMask interface, you will see your wallet address listed below the ‘Account 1’ tab.

Step 4.

Step 4: Add BNB to your wallet.

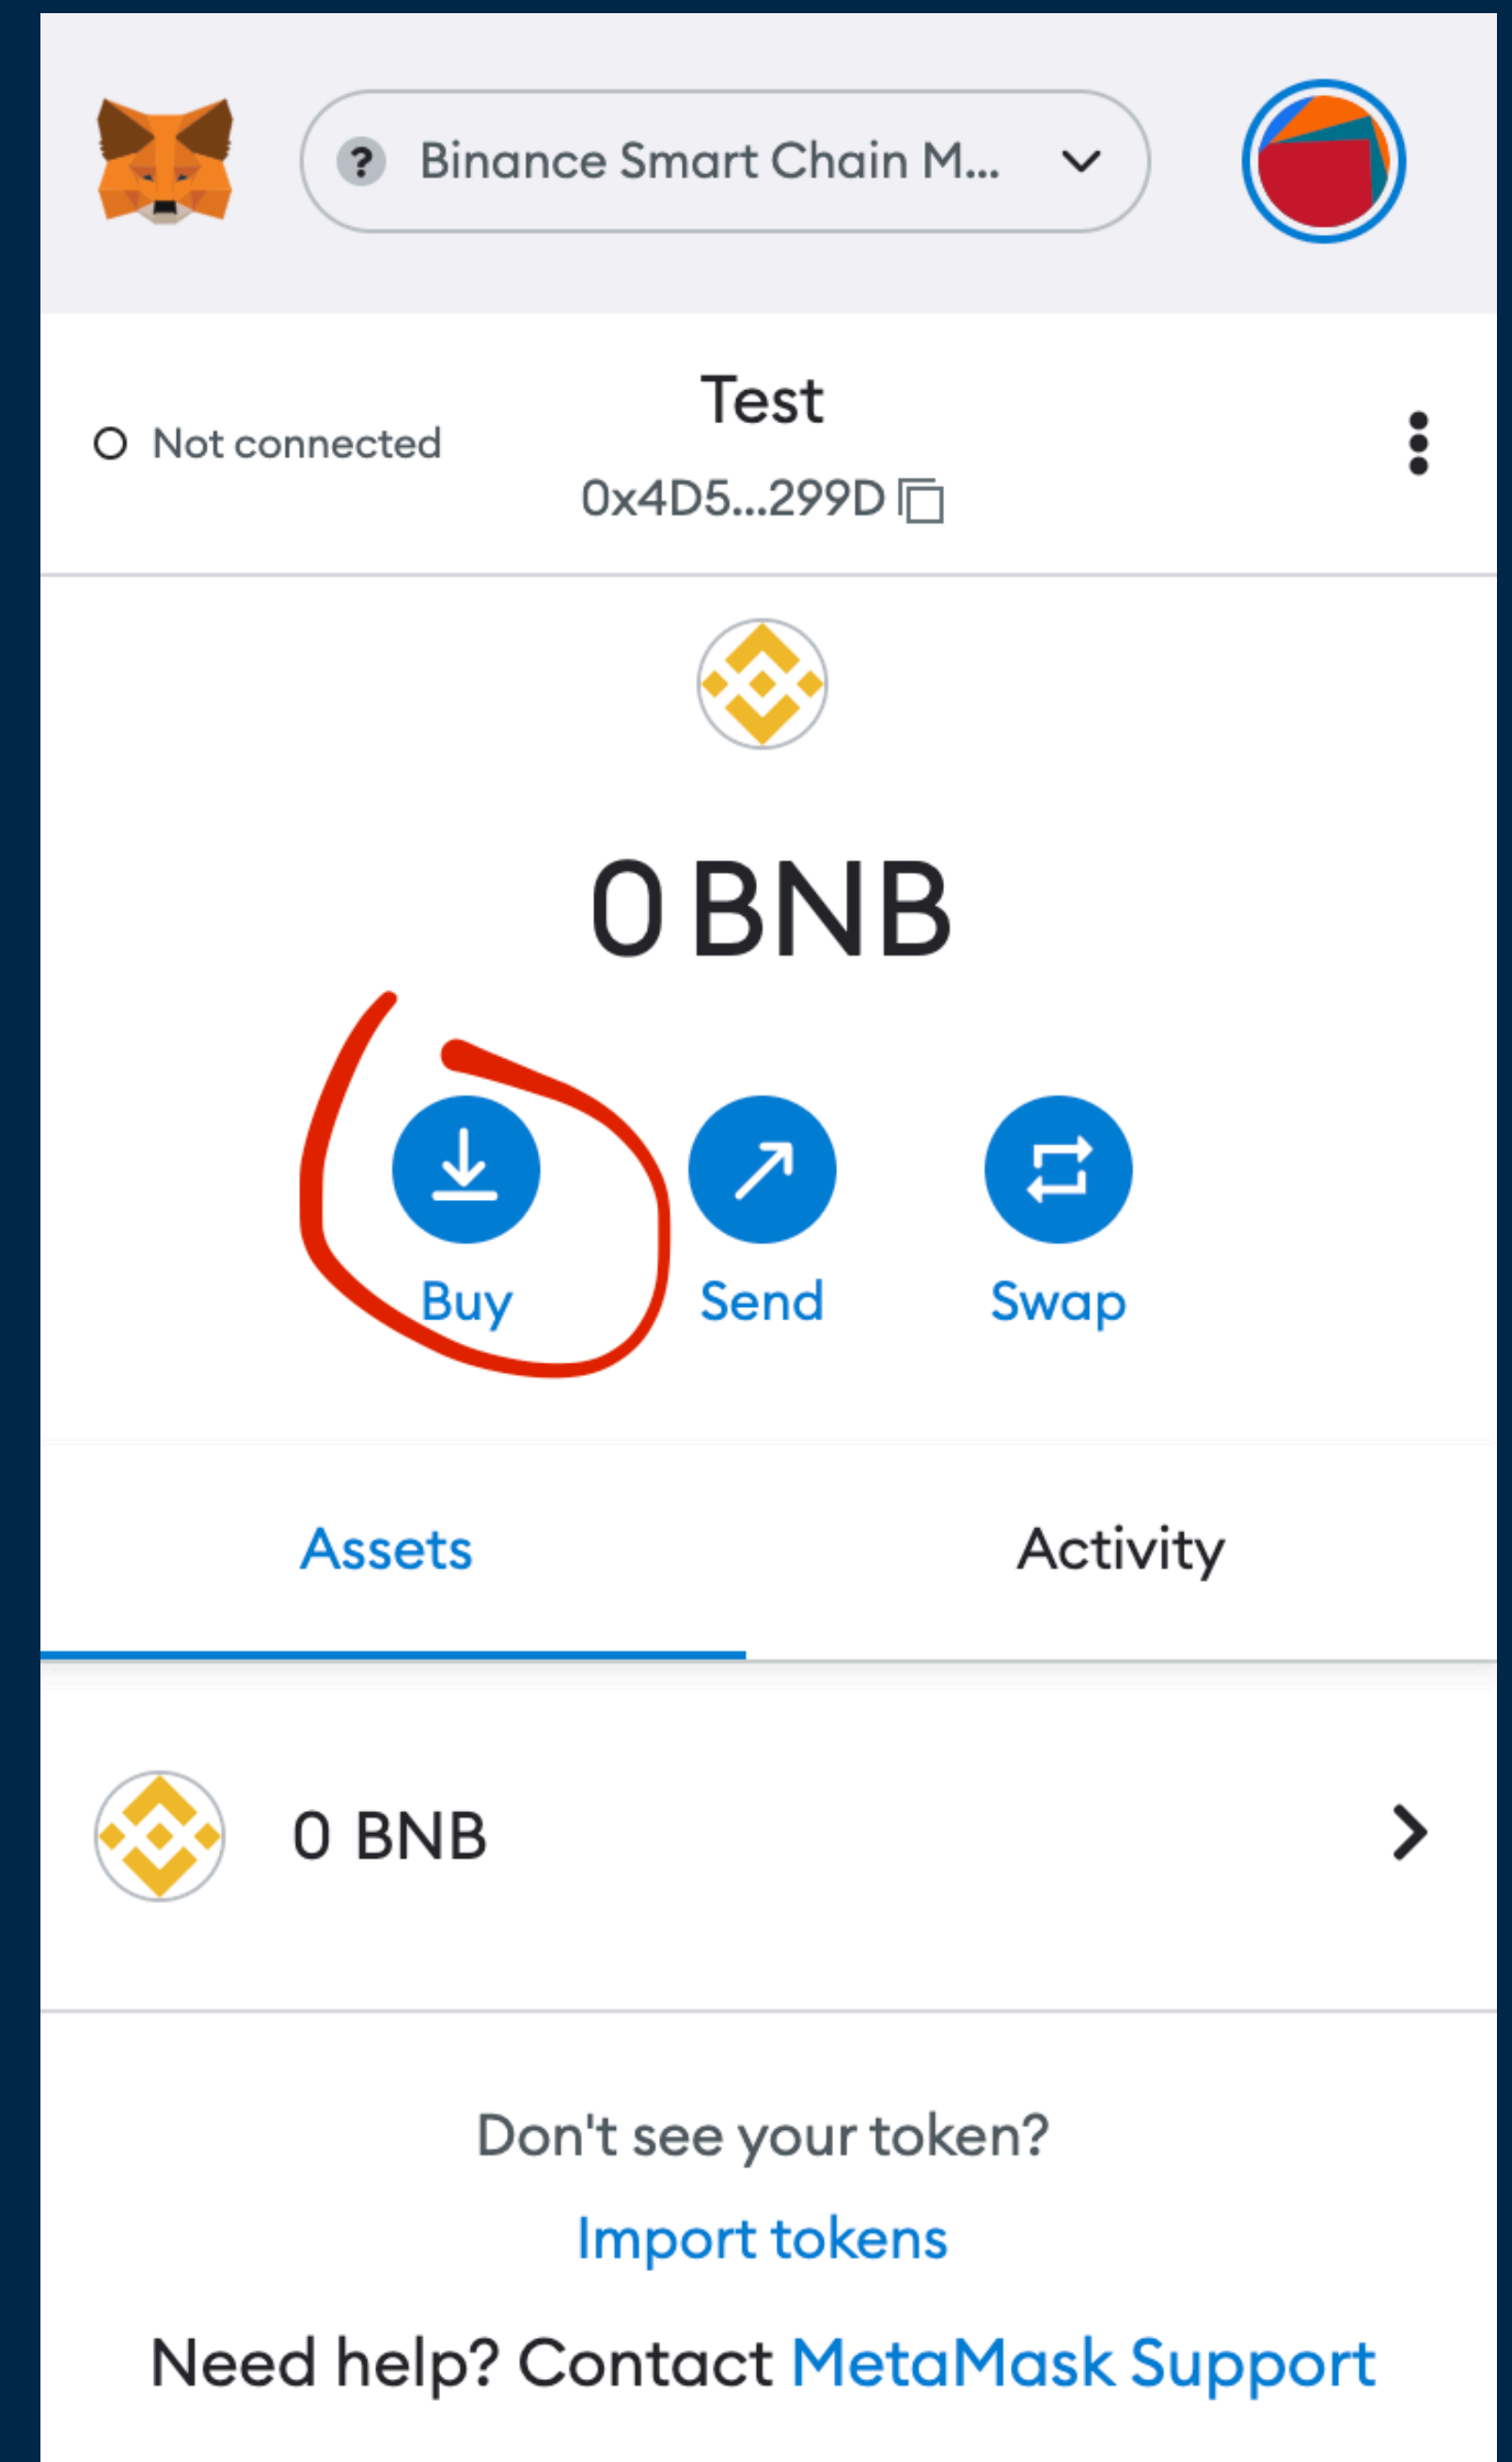

The presale launch site accepts BNB tokens as currency. Therefore if you want to purchase the Thonic token you need to first purchase BNB and use BNBs to make the presale purchase.

Note: Some services may not work in your country. For Canadian residence please see step 4.2

Step 4.1

MetaMask lets you purchase BNB directly from the wallet.

Looking at your list of Assets, click on BNB. Use the 'Buy' button below the BNB balanced displayed to purchase BNB.

Now you will be given options to purchase BNB from third party exchanges. There will be a short purchase process you need to follow.

Once you have made your purchase your new BNB balance will appear in your wallet.

Deposit BNB

To interact with decentralized applications using MetaMask, you'll need BNB in your wallet.

**TRANS AK**

Buy BNB with Transak

Transak supports credit & debit cards, Apple Pay, MobiKwik, and bank transfers (depending on location) in 100+ countries. BNB deposits directly into your MetaMask account.

[Continue to Transak](#)

**MoonPay**

Buy BNB with MoonPay

MoonPay supports popular payment methods, including Visa, Mastercard, Apple / Google / Samsung Pay, and bank transfers in 145+ countries. Tokens deposit into your MetaMask account.

Directly Deposit BNB

If you already have some BNB, the quickest way to get BNB in your new wallet by direct deposit.

[View Account](#)

Service fees may apply

Step 4.2

Most banks in Canada block the services above. Therefore, Thonic has created a temporary service that allows you to purchase and automatically deposit BNB into your wallet.

Please visit this page to make the purchase:

<https://thonic.finance/exchange>

Step 5.

Step 5: Purchase Thonic from our presale

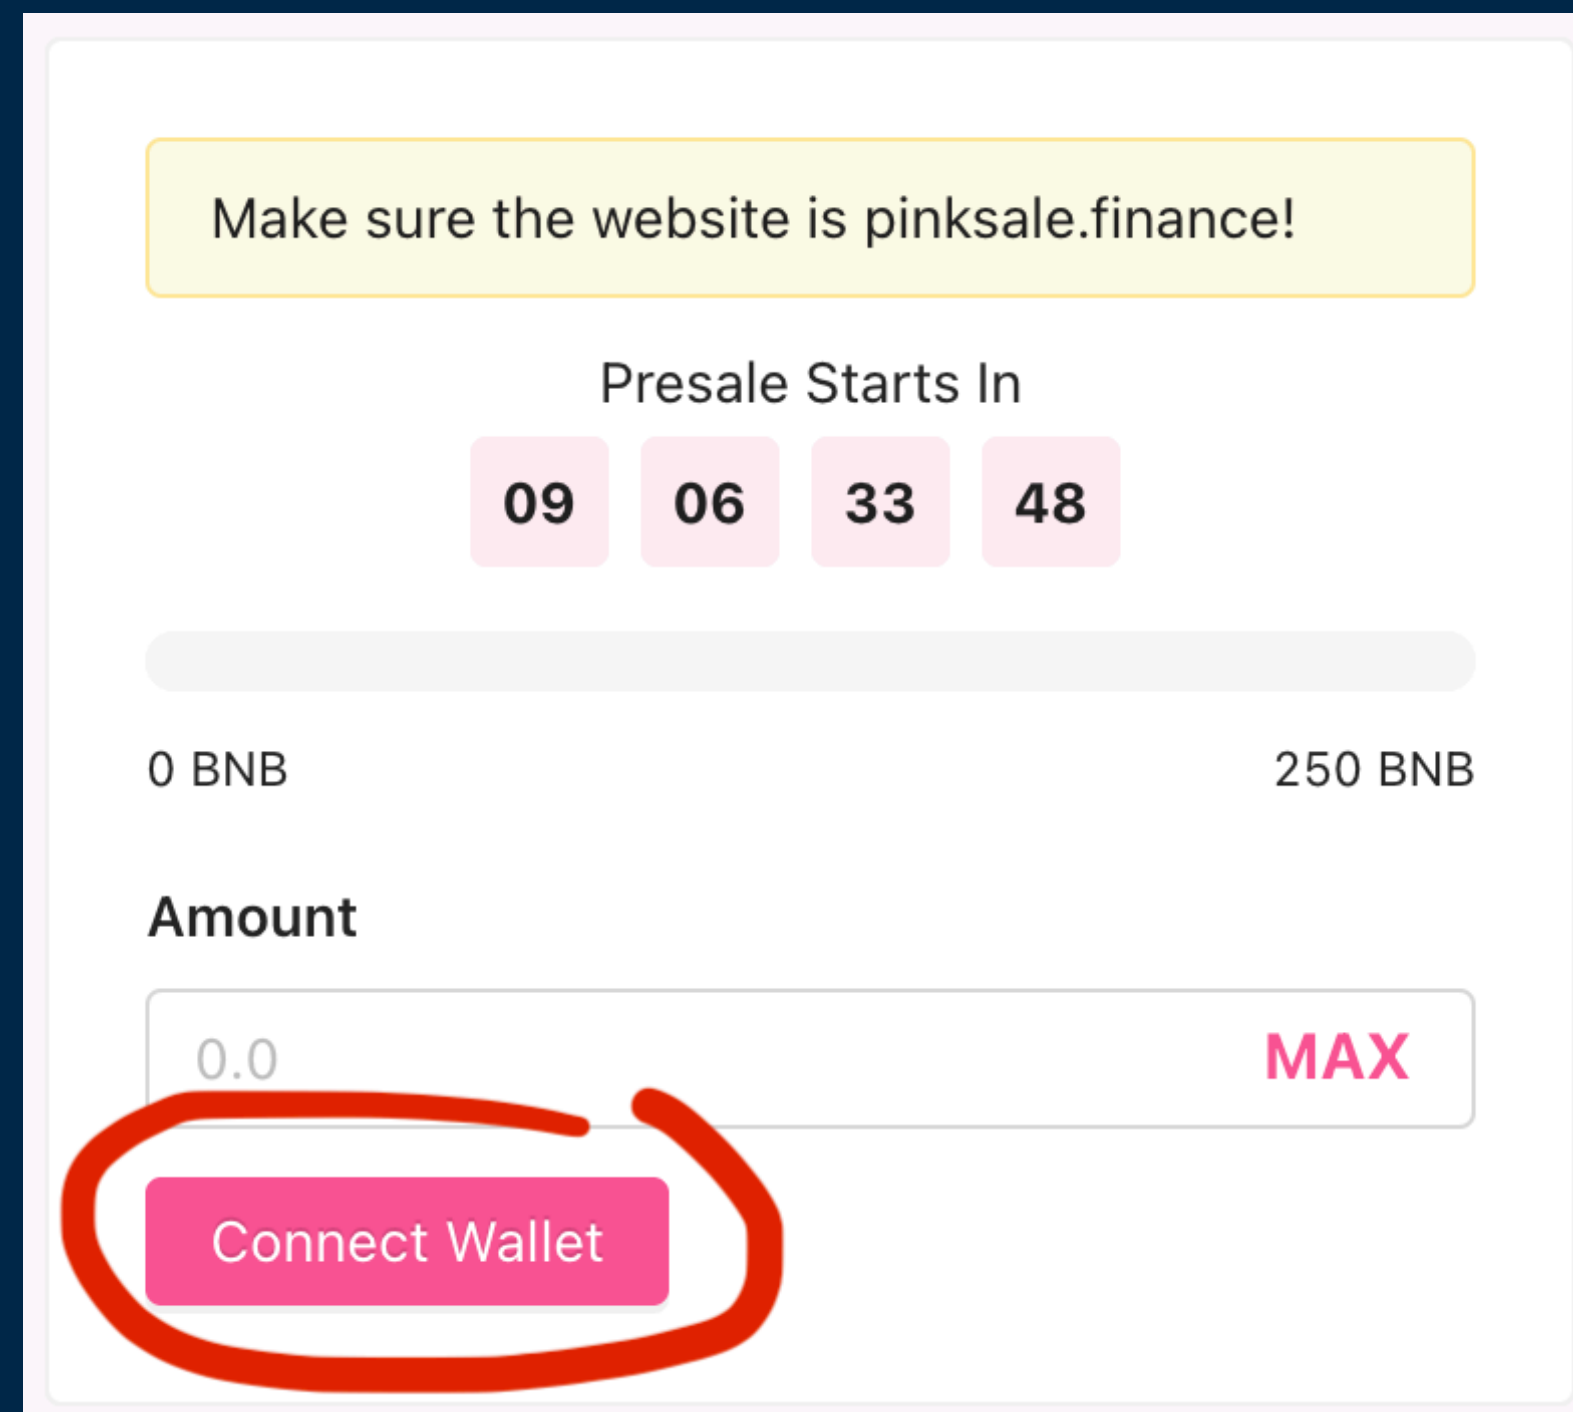

Now that you have a wallet with BNB, we will take you through the process of purchasing the Thonic Presale. Please note you cannot begin this step until the Presale has begun.

Step 5.1

Go to the presale page:

<https://www.pinksale.finance/launchpad/0xF033CbBB77A76fAF7f2a4B560e21854256b2bF91?chain=BSC>

Click the button 'Connect Wallet'.

The screenshot displays the Pinksale Finance launchpad interface. At the top, a yellow warning box contains the text "Make sure the website is pinksale.finance!". Below this, a timer indicates the presale start time: "Presale Starts In" followed by four pink boxes containing the digits "09", "06", "33", and "48". A progress bar is shown below the timer, with "0 BNB" on the left and "250 BNB" on the right. Under the progress bar, the word "Amount" is displayed. Below "Amount" is a text input field containing "0.0" and a pink "MAX" button. At the bottom left, a pink "Connect Wallet" button is circled in red.

Step 5.2

Insert the amount of BNB you want to use to make your purchase in the “Amount” section. The corresponding amount of presale tokens will be calculated automatically below the BNB amount. Finally, click on the ‘Buy’ button.

Make sure the website is [pinksale.finance!](https://pinksale.finance/)

✓ Buy with BNB

Step 5.3

MetaMask will now ask you to confirm the transaction. It will also show you the fee you are required to pay for that transaction. If you agree, then click on the 'Confirm' button to finish the process.
